

LIST OF POSTER PRESENTATIONS

Author Speaker	Title	N. Poster
Agudelo Motato M ^a Alejandra	Hydrocolloids modulate the structure breakdown of starch-based systems under oral conditions	44
Alfieri Fabio	Proteomic characterization and digestion study for the technological evaluation of proteins from legume water extracts	142
Aljewicz Marek	The effect of β -glukans on the availability of minerals from yogurt	60
Al-Razaz Ahmed	A Novel Modelling Approach for Predicting Oral Drugs/Nutrients Absorption in Humans: In Vivo and In Silico Studies	127
Alyami Jaber	In vivo MRI studies of blood glucose and gastrointestinal responses to breakfast porridge made from modern and ancient grains	10
Amigo Lourdes	Application of the international harmonized in vitro digestion protocol (Infogest) to the digestion of vegetal proteins	72
Amigo Lourdes	Quinoa (<i>Chenopodium quinoa</i> Willd.) proteins as source of antioxidant and anti-proliferative peptides after in vitro gastrointestinal digestion	73
Amparo Alegria	Bioaccessibility of plant sterols in plant sterol enriched milk-based fruit beverages: comparison of two in vitro methods	36
Amparo Quiles	Oil-in-water emulsions stabilized by different emulsifiers (cellulose ethers and caseinate): in vitro gastrointestinal digestion.	125
Andrés Ana	Effect of gastric digestion of different food products on acrylamide content	84
Andrés Ana	Influence of fat origin and curing of cheeses on lipolysis extent under simulated intestinal conditions	85
Anton Pluschke	Dietary pectin's effect on digestive pancreatic enzymes and residual macronutrients in grower pigs	155
Arcand Yves	Oat antioxidant bioactive peptides generation during a simulated human dynamic In Vitro Digestion System (IViDiS) Model	51
Arcand Yves	Impact of varietal differences and gen-environment on protein quality and amino acid digestibility of selected Canadian oat varieties: PDCAAS versus DIAAS	52
Ariens Renata	Paracellular transport of Ara h 6 after endurance exercise	37
Arzeni Carolina	Protein carriers for folic acid: characterization of the interaction and bioaccessibility of the vitamin after in vitro digestion	4
Asledottir Tora	Identification and Quantification of Beta-Casomorphin-7 from Bovine Beta-Casein A1, A2 and I after Ex Vivo Gastrointestinal Digestion	128
Assad-Bustillos Melissa	Food oral processing in elderly: impact of oral health status and cereal bakery product properties	98
Astruc Thierry	Pepsin localization in digested meat: a ToF-SIMS analysis	9
Ayar Eda Nur	Bioavailability Enhancement of Lipids by Encapsulation	143
Ballance Simon	In vitro digestion of beta-glucan rich cereal products results in extracts with physicochemical and rheological behavior like pure beta-glucan solutions – A basis for understanding of in vivo effects	67
Boué François	Evolution of food gel structures during simulated gastro-intestinal digestion using Small Angle Scattering at SOLEIL synchrotron	94
Boulier Audrey	In vitro study of micellar casein and caseinate digestion	45
Bourlieu Claire	Gastric lipase and other lipolytic enzymes activity in the preterm infant fed raw, pasteurized or pasteurized-homogenized human milk	117
Brodkorb Andre	The static INFOGEST digestion method: recent developments and practical recommendations	108
Brossard Chantal	Food structure, digestibility and allergenicity: degranulation ability of in vitro digested native and thermally aggregated ovalbumin	83
Bustos Shmidt Mariela Cecilia	Fine fruits enriched pasta: in vitro antioxidant activity and starch digestibility	5
Bustos Shmidt Mariela Cecilia	Sorghum gluten free pasta: in vitro digestion and dialyzable antioxidant activity	6
Bustos Shmidt Mariela Cecilia	Nutritional Quality and glycemic index evaluation of whole grain flours and breads	7
Cádiz Gurrea María de la Luz	Antioxidant and anti-inflammatory activities of bioactive compounds from byproducts	76
Cádiz Gurrea María de la Luz	Different behavior of food polyphenols in energy metabolism of lipopolysaccharide-stimulated cells	77
Cádiz Gurrea María de la Luz	Potential use of micro-, ultra- and nano-filtration membrane techniques for development of functional ingredients from Theobroma cacao	75
Calvez Juliane	Deuterium labeling of milk to determine digestive and metabolic fate of proteins	114
Capozzi Francesco	Impact of an innovative cooking process on protein accessibility	106
Corstens Meinou	Emulsion encapsulation in alginate beads retards lipolysis during dynamic in vitro digestion	89
Cudennec Benoit	Caco-2 cells: a novel identification tool for DPP-IV inhibitors	42
Dafna Meshulam Pascoviche	Impact of droplet triglyceride profiles on emulsion stability and behavior during in vitro pH stat gastrointestinal digestion	159
De Luca Lucia	Influence of individual nutritional status on salivary endocannabinoids and N-acyl ethanolamines upon food mastication in vitro	144
De Oliveira Samira	Impact of homogenization of pasteurized human milk on the kinetics of gastric digestion in the preterm infant	97
Degerli Celalettin	Healthier biscuits formulated with functional ingredients: in vitro digestion using pH-stat and the INFOGEST protocol	69
Deglaire Amelie	Impact of pasteurization of human milk on the kinetics of peptide release during gastric digestion in the preterm infant	96
Di Stasio Luigia	Comparison of the digestibility and antigenicity of raw and roasted whole peanut allergens	122
Doğan Cömert Ezgi	Bound Antioxidant Compounds and Their Digestion Behaviour	102
Dufour Claire	Lipid oxidation and its inhibition by apple polyphenols in static and dynamic in vitro digestion systems	30
Dumont Antonio Fernandez	In vitro protein digestion in the allergenicity assessment of (novel) proteins	12
Dunshea Frank	Rearing in hot environments reduces the transepithelial resistance of Ross 308 broilers	33
Edwards Cathrina	Modelling starch digestion: A case for the single-enzyme system?	92
Egger Lotti	Digestion of Proteins in Milk: Comparing different in vitro systems with in vivo data	3
Erik Ayala Bribiesca	Interaction of calcium with milk fatty acids during the digestion cheese-type matrices	59
Fabiane Petry	Carotenoids and their esters in pulp of three mandarin cultivars: composition and bioaccessibility	50
Felice Valeria D.	Evaluation of the Intestinal Transport of Calcium from a Multi-mineral Natural Product, Aquamin.	88
Fernández López Juana	Bioaccessibility and antioxidant potential of flour obtained from persimmon fruit (<i>Diospyros kaki</i>) co-products during in vitro gastrointestinal digestion	19
Fernández López Juana	Assessment of bioaccessibility and antioxidant potential of flour obtained from cactus pear fruits (<i>Opuntia indica</i>) co-products during in vitro gastrointestinal digestion	20
Ferranti Pasquale	Digestibility of hemp (<i>Cannabis sativa</i> L.) protein isolates	16
Fizman Susana	Relating oral processing (OP) and sensory perception of protein-added yogurts	17

Author Speaker	Title	N. Poster
Floury Juliane	Exploring the gastric disintegration of milk protein gels by time-lapse synchrotron deep-UV microscopy	68
Freitas Daniela	The forgotten role of salivary alpha-amylase on starch digestion: a dynamic in vitro study	105
Gatellier Philippe	Kinetics and mechanisms of N-nitrosation and nitrosylation in a gastro-intestinal model	28
Gence Laura	Static vs dynamic in vitro digestions of an innovative Citrus concentrate: Bioaccessibility of its phytomicronutrients	41
Giblin Linda	Bioavailability of whey proteins using a CaCo2/HT-29 co-culture model	120
Gil Maria	Bioaccessibility of iodine from edible seaweed <i>Fucus spiralis</i>	150
Gille Andrea	The microalgae <i>Phaeodactylum tricornutum</i> as a potential carotenoid source for human nutrition	2
Gouseti Ourania	In-vitro studies of Bread Digestion	115
Grauwet Tara	In vitro starch hydrolysis of common bean process-induced structures	65
Grauwet Tara	In vitro lipolysis and carotenoid bioaccessibility of emulsified oils with different unsaturation degree: a kinetic study	66
Grundy Myriam	Beta-glucan and its effect on lipid metabolism	11
Hageman Jeske	In vitro digestion of infant formula containing cow's milk fat and vegetable fat	136
Hernando Isabel	In vitro gastric digestion of whey protein/hydrocolloids systems. Relationship with satiety capacity	48
Hizlar Birgul	EFFECTS OF EXCIPIENT FOODS AND FOOD MATRIX ON THE CAROTENOID BIOACCESSIBILITY	70
Ilyasoglu Buyukestelli Hulya	Protein and Lipid Digestion Kinetics of Turkish Type Cheeses: using pH-stat and the INFOGEST Protocol	139
Janssen Anja	Effect of pH on gastric digestion of structured proteins	116
Karakaya Sibel	In vitro α -amylase inhibition and α -glucosidase inhibition activities of biscuit enriched with anthocyanin and docosahexaenoic acid	71
Kardinaal Alwine	Gastric emptying breath test: the importance of the food matrix	38
Kasapoğlu Kadriye Nur	Stability of total phenolic content and antioxidant capacity of a local beetroot (<i>Beta vulgaris</i> L.) variety subjected to in vitro digestion	26
Kasapoğlu Kadriye Nur	In vitro protein digestibility of sour cherry kernel (<i>Prunus cerasus</i> L.) protein concentrate	27
Koper Jonna	Availability and AhR activation of luteolin from oregano (<i>Origanum vulgare</i>) during in vitro fermentation using SHIME®	103
Koyuncu Reyhan	Classification Of Nanosized And Lipid Based Delivery Systems And Bioavailability	145
Lamothe Lisa M.	In vitro digestibility of α -glucan polymers with alternating (α 1,4)/(α 1,6) glucosidic linkages	112
Le Feunteun Steven	In silico predictions of pepsin released peptides	81
Le Feunteun Steven	pH-stat monitoring of protein and lipid hydrolysis during in vitro digestions of complex foods	82
Lesmes Uri	Effects of dietary carrageenan: In vitro evidence of carrageenan interference with digestive proteolysis in infants, adults and the elderly	99
Leyva Jimenez Francisco Javier	Spray-drying encapsulation of phenolic compounds from <i>Hibiscus sabdariffa</i> and <i>Lippia citriodora</i> . Potential use as functional ingredients.	157
Leyva Jimenez Francisco Javier	Antimicrobial potential of phenolic fraction in Iranian honeys. Potential ingredient for development of nutraceutical products.	158
López-Nicolás Rubén	The regulation of the complex mechanism of iron absorption induced by different iron sources included in infant formula	123
Lorieau Lucie	Does oral health affect food comfortability and bolus properties during consumption of dairy products in elderly population?	109
Lorieau Lucie	In vitro bioaccessibility of calcium in whey protein matrices depends on calcium sources, gastro-intestinal pH but not on the matrix structure	110
Lozano Sánchez Jesús	Application of an in vivo perfusion model to study the absorption and metabolism of phenolic compounds	134
Lozano Sánchez Jesús	Design of functional ingredients from <i>Sclerocarya birrea</i> stem-bark by pressurized liquid extraction	135
Lupi Roberta	Limited pepsin hydrolysis unmask epitopes of aggregated gliadins	86
Mattar Hadeer	The impact of baked food matrices on structural and allergenic properties of food allergens	61
Ménard Olivia	A first step towards a consensus static in vitro model for simulating full-term newborn digestion: application to infant formulas	29
Micard Valérie	Structure and culinary, sensory and nutritional properties of protein enriched pasta made from legume	90
Míguez Beatriz	Galactoglucomannan-derived saccharides as potential prebiotics to counteract the impact of antibiotic treatments on the elder gut microbiota and the SCFA production: a preliminary study	56
Míguez Beatriz	Xylooligosaccharides from <i>Eucalyptus globulus</i> as promising prebiotics to modulate the elder fecal microbiota	57
Monro John	Undigested kiwifruit remnants modulate glycaemic response to co-ingested carbohydrate food	93
Motoyama Michiyo	In Situ Characterization of Acidic pH and Cooking Effects on Molecular Structure of Protein by Infrared Microspectroscopy	40
Müllertz Anette	Development of an in vitro gastro-intestinal digestion model simulating the young infant pediatric population	53
Nehir El Sedef	Potential inhibitory activity of in vitro-digested spaghetti against α -amylase and amyloglucosidase	141
Netto Flavia Maria	Rheological and nutritional changes in soybean residue (okara) submitted to dynamic high pressure processing	152
Netto Flavia Maria	Digestibility and antioxidant activity of whey proteins and caffeic acid digested complexes	153
Nieva-Echevarria Barbara	Study of in vitro bioaccessibility of vitamin A naturally present in cod liver oil by means of 1H NMR and SPME-GC/MS	31
Nieva-Echevarria Barbara	Antioxidant activity of ovalbumin during in vitro gastrointestinal digestion of oils rich in ω -6 and ω -3 lipids. A study by 1H NMR and SPME-GC/MS	32
Odrizola-Serrano Isabel	The Presence of Pectin in Nanoemulsions: Impact on β -carotene Bioaccessibility	49
Opazo Navarrete Mauricio	Changes on protein structure and digestibility of high hydrostatic pressure treated abalone	132
Opazo Navarrete Mauricio	In vitro gastric digestion of plant proteins	133
Özçelik Beraat	The Influence of extraction conditions on in vitro protein digestibility of <i>Spirulina platensis</i> protein extracts: An optimization study with RSM	24
Özçelik Beraat	Dried Leafy Green Vegetables : Investigation of In Vitro Bioaccessibility of Total Phenolic and Total Flavonoid Content	25
Özçelik Beraat	Bioavailability of ACE Inhibitory Peptides	146
Özçelik Beraat	Effects of Food Matrix and Delivery System Interactions on Lipid Bioavailability	147
Paola Vitaglione	Appetite control through the bitter taste	156
Peinado Irene	Influence of particle size after chewing on fat availability of different nuts	107

Author Speaker	Title	N. Poster
Peyron Marie-Agnès	Combining in vitro mastication and digestion: a new concept to investigate nutrients bioaccessibility in the elderly	124
Pilosoof Ana M. R.	The impact of competitive adsorption between Soy protein and HPMC on emulsion lipolysis	78
Pilosoof Ana M. R.	In vitro digestion of chia oil/water emulsions stabilized by lecithin, glycerolmonostearate and their mixtures	79
Pilosoof Ana M. R.	Interactions between different types of emulsifiers and Bile Salts in aqueous solution.	80
Pimentel-Moral Sandra	Multiple emulsions containing Hibiscus Sabdariffa extract stabilized by protein-polysaccharide complexes for the development of functional food	62
Pimentel-Moral Sandra	Pressurized liquid extraction (PLE) for obtaining bioactive ingredients from Hibiscus Sabdariffa	63
Pimentel-Moral Sandra	Optimization of extraction of phenolic compounds from a phenolic-enriched functional olive oil	64
Pineda Vadillo Carlos	In vivo digestion of DHA-enriched egg products: Effect of the food matrix structure on the DHA digestion kinetics and bioavailability.	154
Pinheiro Ana Cristina	Enhancing curcumin bioaccessibility through different nanoformulations	74
Pol Korrie	Arabinose: a potent pentose for reducing blood glucose and insulin responses	130
Prosser Colin	Comparison of protein digestibility of goat and cow milk based infant formulas tested in the dynamic in vitro model tiny-TIM	95
Prot Aurelie	Food bolus formation: effect of oral and anthropometric characteristics in function of dental status among elderly.	39
Qi Luo	Pepsin and acid diffusion in whey protein gels: towards understanding the effect of food structure in gastric digestion	104
Recio Isidra	Novel opioid peptides arising from milk protein gastrointestinal digestion	13
Recio Isidra	Transepithelial transport of lunasin and digestion-derived peptides through Caco-2 monolayers. Inhibitory effects on gastrointestinal cancer cells proliferation	14
Recio Isidra	Peptides released during in vitro gastrointestinal digestion from common bean (<i>Phaseolus vulgaris</i> L.). Transepithelial transport through Caco-2 cell monolayers.	15
Ropers Marie-Hélène	Physical evolution of titanium dioxide particles in digestive fluids	21
Ropers Marie-Hélène	Investigating the effect of an inorganic food additive containing nanoparticles on human intestinal microbiota	22
Ros Berruezo Gaspar	Recombinant human lactoferrin hydrolysate is more efficient than intact lactoferrin in alleviating LPS-induced intestinal inflammatory response	129
Rovalino-Cordova Ana	Limited starch bio-accessibility in cereals and legumes: What is the role of plant cell walls?	100
Salvador Ana	Fat digestibility in hydrocolloid-based emulsions	87
Salvia-Trujillo Laura	Influence of emulsifier type and emulsion droplet size on lipid hydrolysis, micelle formation and carotenoid bioaccessibility kinetics	121
Santé-Lhoutellier Veronique	Combining in vivo, in silico digestion and 3D conformation to predict potential bioactive peptides: case of myoglobin	119
Santiago Liliana Gabriela	Impact of in vitro digestion on the colloidal stability of powdered flaxseed oil microcapsules	1
Sayago-Ayerdi Sonia G	Influence of ultrasound-assisted extraction on the in vitro bioaccessibility of carotenoids in 'Ataulfo' of mango (<i>Mangifera indica</i> L.) by-products	137
Sayago-Ayerdi Sonia G	Development of healthy snacks fruit using mango (<i>Mangifera indica</i> L.) and pineapple (<i>Ananas comosus</i> L.) treated with UV-C	138
Sayago-Ayerdi Sonia G.	Bioconversion by gut microbiota of predigested mango (<i>Mangifera indica</i> L) peel polyphenols assessed in a dynamic in vitro model of the human colon	34
Sayago-Ayerdi Sonia G.	In vitro colonic fermentation of Mexican "taco" from corn tortilla and black beans in a Simulator of Human Microbial Ecosystem (SHIME®) system	35
Siltari Aino	Absorption of bioactive tripeptides across Caco2 cell membrane and rat intestine in vitro	91
Simsek Sebnem	Protein hydrolyses and bioactivities of the resultant peptides of goat milk and kefir during in vitro digestion	140
Sopelana Patricia	Study by 1H Nuclear Magnetic Resonance of the evolution of refined soybean oil with different oxidation status under in vitro digestion conditions	46
Sopelana Patricia	Advance of oxidation during in vitro digestion of edible oils of different unsaturation degree containing hydroperoxides. A study by SPME-GC/MS and by 1H NMR	47
Souchon Isabelle	Influence of structure parameters of complex foods during in vitro digestions: Interaction between proteolysis and lipolysis	118
Suna Senem	Determination of Total Phenolic Content and Antioxidant Capacities of Energy Reduced Erica arborea Herbal Tea Beverages Via an In-Vitro Digestion Method	149
Tárrega Maria Amparo	Particle size and saliva uptake during eating of cooked hams with different initial mechanical properties	43
Thévenot Jonathan	Pepsin diffusion in dairy gels depends on casein concentration and microstructure	101
Tomassen Monic	Impairment of intestinal integrity results in paracellular transport of in vitro digested casein.	111
Tournier Carole	Infant's saliva lipolysis: relationships with age, milk and complementary feeding history	54
Tullberg Cecilia	Oxidation of marine oils during in vitro digestion with human gastrointestinal juices – role of oil origin, lipolytic action and added tocopherols	113
Van den Abbeele Pierter	An advanced in vitro technology platform to study the mechanism of action of actives in the upper gastrointestinal tract	131
Van Hecke Thomas	The potential of herbs and spices to reduce lipid oxidation during heating and gastrointestinal digestion of a beef product	126
Virgilio Nicolina	Satiety effect of a milk proteins enriched beverage in women after exercise	55
Warren Frederick	Food starch structure governs gut microbiome composition, digestion kinetics, and fermentation	58
Wrunkowska Małgorzata	Analysis of antioxidant capacity and bioaccessibility of buckwheat enriched bakery products in model simulating gastrointestinal human tract.	18
Xiao Dong Chen	Progressive Construction of More Realistic Species Specific in Vitro Digestion Bio-Mechatronic Models	151
Yücepete Aysun	The influence of the degree of hydrolysis on antioxidant activity and bioaccessibility of protein hydrolysates of <i>Spirulina platensis</i>	148
Zahir Mostafa	Plant protein digestibility: The impact of plant cell wall encapsulation and porosity	23
Zhu Xuan	Study on stability of vitamin B12/whey protein complexes and their effects on gut microbiome	8
